

Redstor migrates data centre to Equinix's LD4/LD5 IBX Campus

Reading UK, 30th March - [Redstor](#), a managed services, cloud storage and IT solutions provider, today announced the migration of its data centres from Bracknell MDNX to Equinix, Inc. (NASDAQ: EQIX), a provider of global data centre services.

The move is part of Redstor's continued investment in its Cloud strategy and creates a 'business grade' backup & storage grid combined with a Cloud DR and business continuity platform. The Equinix LD4/LD5 IBX data centre campus in Slough is connected to the peering fabric of LINX, one of the largest metro area Internet exchanges in Europe. In combination with the 50+ networks already hosted by Equinix, Redstor's customers will have unparalleled connectivity.

Tony Ruane, Business Development Director and Co-Founder of Redstor said: "Over the past 12 months we have focused on expanding our cloud storage and business continuity platform in response to growing customer demand."

The Equinix ISO27001 and 9001:2008 certified state-of-the-art data centres will provide Redstor's customers with highly resilient yet energy efficient data centre services. "The physical security of the Equinix IBX centre is our highest priority." said Russell Poole, General Manager, Equinix UK. "Each IBX utilises an array of security equipment, techniques, and procedures to control, monitor, and record access to the facility, offering unparalleled protection of customer data."
